Shredder Performance Kit Available

Confidential information can be found in many different formats, so why not have a shredder that can destroy them all? With this in mind, Dahle's developed a new generation of shredders that can destroy more than just paper. This Multi+Media Shredder is designed to shred between 2,000 and 8,000 sheets of paper per day as well as CDs and DVDs. The shredder's contemporary design and large storage capacity makes it a nice addition to any large office, copy room or communications center.

The 30414 is chain driven to provide slip free power to the cutting mechanism from the powerful 1 1/4 Hp motor. A solid steel frame houses and aligns two perfectly matched cutting cylinders milled from a single bar of German Solingen steel. The result is a machine

with strength, power, and the ability to handle all of your information destruction needs.

Dahle incorporated the latest technology when developing this Multi+Media Shredder. Standard operator functions are made possible through an easy-to-use control pad. This allows you to power the unit up and place it in either forward, reverse, or continuous run. The wooden cabinet not only houses the shredded waste but also deafens the noise to allow for whisper quiet operation. Not sure when your waste bag is full? Your shredder will inform you through audible and visible warning indicators. Once your shredder is empty and the door is closed, it will resume normal operation.

Touch pad with LED indicators ensure you have total control of all shredder functions.

Contemporary wooden cabinet houses shredded waste and deafens noise for quite operation.
